Andrew Blinn

VISION W

I use programming language theory to explore, explain, and engineer compositional interfaces, trying to make engagement with algebraic abstractions more fluid, tangible, and fun

Focuses \equiv

Programming Languages + Liveness + Learning · Human-Computer Interaction

Papers 4

An Integrative Human-Centered Architecture for Interactive Programming Assistants · VLHCC · 2022 Andrew Blinn, David Moon, Eric Griffis, Cyrus Omar

An architecture for programming assistants addressing integrative design challenges, including a formal framework for assistant suggestion sensibility: @ Paperclip Calculus

Total Type Error Localization and Recovery with Holes · POPL · 2024

Eric Zhao, Raef Maroof, Anand Dukkipati, Andrew Blinn, Zoe Pan, Cyrus Omar The marked lambda calculus is a formal account of total error localization and recovery, keeping editor semantic services fed even downstream of errors

Gradual Structure Editing with Obligations · VLHCC · 2023

David Moon, Andrew Blinn, Cyrus Omar

By foregrounding terms, structured editors compromise casual text-like editing. Finer-grained syntactic obligations allows looser edits while guaranteeing reassembly

Filling typed holes with live GUIs · PLDI · 2021

Cyrus Omar, David Moon, Andrew Blinn, Ian Voysey, Nick Collins, Ravi Chugh Livelits allow users to fill program holes by directly manipulating user-defined GUIs embedded persistently into code, providing continuous graphical feedback

WORKSHOP PAPERS

Toward a Live, Rich, Composable, and Collaborative Planetary Compute Engine · PROPL · 2024 Alexander Bandukwala, Andrew Blinn, Cyrus Omar

We sketch a programming environment for planetary computing with climate science applications

Tylr - A Tiny Tile-based Structure Editor · TyDe · 2022

David Moon, Andrew Blinn, Cyrus Omar

Tylr combines hierarchical and linear editing paradigms via a novel destructuring mechanism

School \triangle

University of Michigan · Ph.D Candidate, Computer Science · Now

Contextualizing coding with types, interfaces, & language models with Cyrus Omar @ FPLab

University of Michigan • Master's of Science, Computer Science • 2023

Coursework in PL theory, program synthesis, category theory, HCI, & the psychology of learning

University of Toronto · H.B.Sc, Mathematics & Computer Science · 2019

Graduate coursework in abstract algebra, compilers, & graphics. Advised by Gary Baumgartner

INDUSTRY &

TODAQ Toronto • Full-stack development in Clojure • 2019 - 2020

Built novel front-end interfaces to sharpen the materiality of distributed digital assets. Implemented core back-end features for a decentralized digital asset management protocol

Conferences 1 **Programming Committee Member** • Pasadena 2024: Onward! • HATRA • LIVE Invited speaker at RacketCon · 2019 · Salt Lake City · Recorded Talk · Slides Introduced Fructure, a prototype structured interaction engine for edit-time term-rewriting Accepted speaker at Midwest PL Summit • 2023 • Ann Arbor • Slides Progress report on type-directed prompt construction for LLM-powered code completion Accepted speaker at VL/HCC · 2022 · Rome · Recorded Talk · Slides Presented an integrative human-centered architecture for interactive programming assistants Guest Lecturer · 2023 & 2022 · Ann Arbor Introduction to metaprogramming featuring Racket for EECS 490 - Programming Languages **Student Volunteer** • Chicago 2021: SPLASH/OOPSLA **Seat Filler** • Rome, Chicago, Salt Lake City, Galiano, Toronto, Eugene, St.Louis, Empire Builder 2023: MWPLS, Local First Unconf, Fission TrainJam, Strange Loop, Gradient Retreat, Causal Islands 2020 - 2022: VL/HCC, Gradient Retreat, SPLASH/OOPSLA, HATRA LIVE 2019: Racket's How to Design Languages Summer School, Clojure North. 2018: Oregon Programming Languages Summer School, ICFP, Strange Loop, RacketCon TEACHING 2 **Course Development** • 2022 - Now • University of Michigan Wrote assignments and software infrastructure for EECS 490 - Programming Languages Implemented Hazel Exercises, an educational editor integration providing progressive live feedback

Course Development • Summer 2018 • University of Toronto

Designed course materials for CSC 324 - Principles of Programming Languages including an algebraic stepper illustrating non-determinism, and a little language demonstrating pattern matching

Teaching Assistantship • 2018 - Now • Universities of Michigan & Toronto

2023, 2022, 2021 University of Michigan EECS 490 - Programming Languages
2019, 2018 University of Toronto CSC 324 - Principles of Programming Languages
CSC 324 - Principles of Programming Languages
CSC 104 - Introduction to Computational Thinking

MENTORSHIP Q

June (Jacob) Kim: LLM type-directed Hole-filing in TypeScript • 2024 - Now
Extracting semantic information from the TypeScript language server to inform prompt construction

Xiang (Kevin) Li: Type-constrained LLM Code Completion via token masking • 2023 - *Now* Researching modifying local language model decoding to ensure semantic as well as syntactic invariants

Zachary Eichenberger & Eric Fan: Deep reinforcement learning for code completion • 2021 - 2023 Applications of typed structured editing for RL-based completion. Co-mentorship with Ethan Brooks

Yash Gaitonde: Interfaces for live feedback in teaching IDEs · 2021 - 2022
Implementing live test feedback in the Hazel IDE, deployed to a class of 100 undergraduates

Projects 📮

IDE Design, Implementation, Deployment, and Analytics with Cyrus Omar · 2020 - Now Led a ground-up rewrite of the Hazel IDE, deployed to 100 undergraduates

Investigations in Dynamic, Interactive Algebraic User Interfaces • 2022 - *Now* Exploring tangibility and explorability in expository math and meta-math with nool and furl

Variability-aware Data Structures with Marsha Chechik & Ramy Shanin · 2018 - 2019 · Slides
Research in variational analysis of SPLs including building SpyShare, a Haskell tool using Graphviz to visualize structure sharing, and designing + formally modelling rewrite-rule based optimizations

Independent Study in Structured Editing in Racket with Gary Baumgartner • Summer 2017 Self-directed studies in languages tooling resulting in Fructure and Containment Patterns
